SUMMARY

Computer Science student (Class of 2027) and AWS Certified Cloud Practitioner who ships production software end to end — a publicly deployed calendar web app on AWS, an AI-driven SaaS platform for creators, and an employee-onboarding chatbot in Microsoft Copilot Studio. Experienced across cloud infrastructure, technical support, data reporting, and embedded computer vision.

EDUCATION

Illinois State University — Normal, IL

B.S. in Computer Science — *Expected May 2027 | GPA: 3.41 / 4.00*

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL, HTML/CSS

Cloud & Tools: AWS, Git, VS Code, Power BI, Office 365, VMware, Eclipse, Stripe

Hardware: Arduino, ESP32, Desktops, Laptops

EXPERIENCE

Student Analyst — Sept 2024 – Present

Illinois State University — *Normal, IL*

- Resolve university account and access issues for students, faculty, and staff as the first point of contact.
- Triage and route technical tickets to the correct specialist teams, keeping resolution times low.
- Analyze student data to identify trends, build reports for departmental assessments, and partner with faculty to turn findings into student engagement strategies.

IT Intern — June 2025 – July 2025

Ohnward Bancshares — *Maquoketa, IA*

- Solely designed and built an employee-onboarding chatbot in Microsoft Copilot Studio, streamlining new-hire ramp-up.
- Maintained and troubleshot bank staff hardware and software across the organization.
- Managed user accounts and access permissions, and documented IT processes to improve team knowledge sharing.

UX Intern — June 2023 – Aug 2023

Innovate 120 — *Maquoketa, IA*

- Partnered with enterprise companies to solve real UX problems in their products through user research and usability testing.
- Conducted market and consumer research and built wireframes and prototypes to guide design recommendations.

PROJECTS

ClksOptimal — AI SaaS Platform for Content Creators

- Founded and built a SaaS platform that generates AI-driven video titles, analyzes thumbnails, and evaluates click-through rate potential for creators.
- Integrated Stripe for tiered pricing and subscription billing.

RetsCalendar — Cloud-Hosted Calendar Web App (Live)

- Designed, built, and deployed a full calendar web app live to the internet, owning AWS hosting, networking, and domain setup end to end to ship a publicly accessible product.

Tech: AWS, JavaScript, HTML/CSS, Networking, Deployment

Arduino Facial Recognition

- Built a facial-recognition system on an Arduino with a camera module, bridging embedded hardware with computer vision on a constrained device.

Tech: Arduino, Embedded C++, Computer Vision

CERTIFICATIONS

AWS Certified Cloud Practitioner | Data Scientist: Machine Learning
